

## **PMWeb Full and Collaboration License Comparison**

**PMWeb Full User License...** all-inclusive access to the entire PMWeb Enterprise Platform plus the comprehensive ability to create records and documents throughout (according to the User's security settings set by the system administrator). A Full User License is one User per license.

**PMWeb Collaboration User License...** designed for internal/external collaborators, Collaboration Users have access to the entire PMWeb Enterprise Platform (according to the User's security settings set by the system administrator) and can create records in the system according to the chart attached. Collaboration Licenses are available as Named (one User per Collaboration license) or Concurrent (Users are part of a pool of Collaboration license Users).

It is important to note that Full User and Collaboration Named licenses are easily re-assignable if and when necessary.

### **Collaboration Users can:**

- Create and Submit Templates and Forms
- Create and Submit an Online Invoice
- Create and submit an Online Bid
- Create and Submit a Timesheet
- Create and Submit a Tenant Request
- View, upload and download documents as part of Workflow participation
- Participate in any record in the database if they are included in the workflow.

### **Full Users can:**

- Control a Budget while a Collaboration User cannot
- Issue a Contract while a Collaboration User cannot
- Change a Schedule while a Collaboration User cannot
- Create Companies while a Collaboration User cannot
- Create Projects while a Collaboration User cannot
- Define Programs or Lists while a Collaboration User cannot

\*Collaboration Users can create record types in the system according to the following chart.
